---

SUMMARY

Full Stack Web Developer specializing in Ruby on Rails, with a strong focus on building dynamic applications and enhancing user experiences. Passionate about learning new technologies, solving complex problems, and continuously improving my skills to deliver high-quality solutions.

SKILLS

• Backend Development: Ruby on Rails, PostgreSQL, Redis, Sentry Sidekiq
• Frontend Development: Hotwire, Turbo, Stimulus, Tailwind

EXPERIENCE

Ruby full stack web developer| Dependev (Remote)   **January 2024 – June 2024**

As a developer working with the Avo gem, ensured that all of our 250 customers were able to build and ship their apps fast and on time by contributing and enhancing its functionality and usability within Ruby on Rails applications using Hotwire
Key contributions include:
• build full-featured features like: dashboard-wide advanced filters, improved the actions infrastructure, search improvements, authorization tweaks, and more
• ensured documentation was up to date with copy, images, and examples to boost user adoption
• keep the demo app populated with demo features
• improved the UI
• ensured robust behavior through fixes like truncating long messages and proper handling of authorization policies
• offered technical support to customers: troubleshooting, investigating, and fixing corner-cases, bugs, and features
• Used: Ruby on Rails, Hotwire, Avo gem

Ruby full stack web developer | Duty Labs (Remote)   **March 2023 - June 2023**
• Developed a dynamic booking application using gems like Sidekiq, language_filter, ziptz, Pundit, ActiveAdmin, and others
• Optimized the application's efficiency
• Introduced language_filter to improve content moderation
• Engineered a time zone conversion mechanism for seamless interaction across different time zones
• Developed an intuitive admin portal using ActiveAdmin to oversee user interactions, booking management, and content moderation
• Integrated forward-looking features to enhance user engagement
• Implemented a robust notification system
• Maintained a credible content ecosystem and detected and resolved technical glitches

• Continuously introduced novel features to expand the platform's capabilities and user engagement potential
• Catered to evolving user needs with visionary thinking and problem-solving
• Committed to advancing the platform's functionality and user experience

PERSONAL PROJECTS

Near_You

Full Stack Web Application for Local Service Booking

• Conceptualized, designed, and built a web app that connects users with local service providers.

• Key features include:

• **For Providers:** Service category selection, location-based services, hourly rate management, reviews, availability scheduling, and Stripe payments.

• **For Users:** Appointment booking, Google Maps integration, notifications via noticed gem and mail, and profile management.

• Utilized **Active Storage with AWS S3** for efficient image hosting and storage.

• Focused on user-centric design to simplify the booking process for Romanian users.

• **Tech stack:** Ruby on Rails, Tailwind CSS, PostgreSQL, Hotwire, Active Storage.
